Joomla!-Erweiterungen

Module

- Zeigen spezielle Inhalte
- Werden im Template an "Positionen" angezeigt
- Konfiguration in der Modulverwaltung
- Beispiel:
 - Menümodul
 - Eigene Inhalte

Komponenten

- Zeigen Ausgabe in Frontend und Inhaltsbereich an
- Sehr komplexe Erweiterungen
- Haben meist einen eigenen Administrationsbereich
- Beispiel:
 - Inhaltsanzeige
 - Suche

Plug-ins

- Systemseitig, können verschiedene Funktionalitäten haben
- Können Content verändern
- Kann aber auch der TinyMCE-Editor im Backend sein
